POWERFUL R-R-R-ride

Off-road car racing is a popular sport that gives adrenaline, excitement, and a powerful energy charge to both racers and fans. For all racing fans, model collectors, and fans of puzzles we present the construction set "Mad Buggy!"

IN THE 1950s

The first buggies appeared during this time. The name resembles the famous Volkswagen Beetle from which such race cars were made. Buggy is a variation of the word "beetle." To increase the cross country capability of the car, it was radically re-equipped. Heavy parts, such as the body and doors, were removed and replaced with lighter pieces.

Military Operations

High cross country ability has made the buggy an indispensable vehicle for military operations. In combat zones, buggies are used to move both people and valuable cargo. For example, the US Army uses buggies to patrol desert terrain.

Computer Games

Cars like buggies are great for spectacular races, which are often portrayed in computer games. In addition to the game Mad Max, based on the movie of the same name, buggies can be seen in the game Beach Buggy Racing and many other computer games.
