EN:	Warning! For the correct operation of this model, it is necessary to clean carefully and to lubricate all rubbing parts with paraffin during assembly. All mechanisms must rotate freely.	
Problems:	Possible causes and their elimination:	
The mechanism rotates tight	Gears and bushings are poorly lubricated or cleaned. Work up a mechanism by idling	
Rubber bands on the motor are damaged	Remove damaged rubber bands and replace with new ones that are included in the kit using part 0.	

UA:	Увага! Для коректної роботи даної моделі, необхідно при збірці ретельно зачищати, змащувати парафіном усі деталі, які труться. Усі механізми повинні вільно обертатися.	
Проблеми:	Можливі причини та шляхи їх подолання:	
Механізм туго обертається	Шестерні та втулки погано змащені або зачищені. Розробіть механізм шляхом роботи на холостому ходу.	
Пошкоджені резинки на моторі	Видалити пошкоджені резинки та замінити на нові, що входять в комплект, за допомогою деталі № 0.	

DE:	Hinweis! Für einen korrekten Betrieb dieses Modells ist bei dem Zusammenbau erforderlich, alle Reibteile sorgfältig auszumirgeln und mit Paraffin zu schmieren. Alle Bauteile sollen sich frei drehen.	
Probleme:	Mögliche Ursachen und deren Beseitigung:	
Der Mechanismus dreht sich schwer	Die Zahnräder und Buchsen sind schlecht geschmiert oder ausgemirgelt. Lassen Sie den Mechanismus im Leerlauf ausarbeiten.	
Die Gummistücke am Motor sind beschädigt	Entfernen Sie die beschädigten Gummistücke und ersetzen Sie diese durch neue, die im Kit enthalten sind, indem Sie den Teil 0 hierfür verwenden.	

FR:	Attention ! Pour le bon fonctionnement de ce modèle, il est nécessaire lors du montage de nettoyer et lubrifier soigneusement toutes les pièces à friction avec de la paraffine. Tous les mécanismes doivent tourner librement.	
Problèmes:	Causes possibles et leur élimination:	
Le mécanisme tourne serrée	Les engrenages et les bagues sont mal lubrifiés ou nettoyés. Développez un mécanisme en tournant à vide.	
Les gommés sur le moteur sont endommagées	Retirez les gommés endommagés et remplacez-les par de nouveaux qui sont inclus dans le kit à l'aide de la pièce 0.	

PL:	Uwaga! Aby ten model działał prawidłowo, podczas montażu wszystkie detale trące muszą być dokładnie oczyszczone i nasmarowane parafiną. Wszystkie mechanizmy muszą się swobodnie obracać.	
Problemy:	Możliwe przyczyny i ich eliminacja:	
Mechanizm obraca się z oporami	Koła zębate i tuleje są słabo nasmarowane lub niewystarczająco oczyszczone. Przygotuj mechanizm na biegu jałowym.	
Zostały uszkodzone podkładki gumowe na silniku	Uszkodzone podkładki gumowe należy usunąć i wymienić na nowe, dołączone do opakowania, zastawiając część 0.	

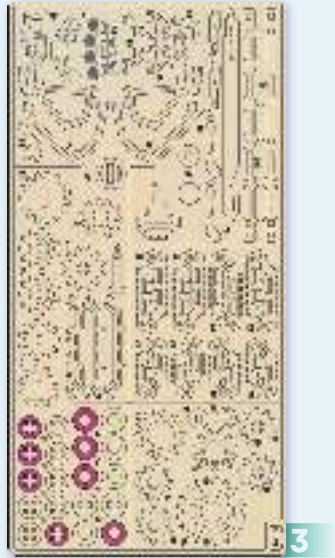

SP:	¡Atención! Para el funcionamiento adecuado de este modelo a la hora de ensamblaje se recomienda alisar y lubricar cuidadosamente con parafina todos los detalles frotantes. Todos los mecanismos deben girar libremente.	
Problemas:	Posibles causas y su eliminación:	
El mecanismo gira difícilmente	Los engranajes y bujes no están bien lubricadas y alisadas. Mejore el movimiento del mecanismo mediante su funcionamiento en marcha en vacío.	
Las gomas de motor están dañadas	Elimine las gomas dañadas y sustitúyelas por nuevas, incluidas en el conjunto, utilizando detalle 0.	

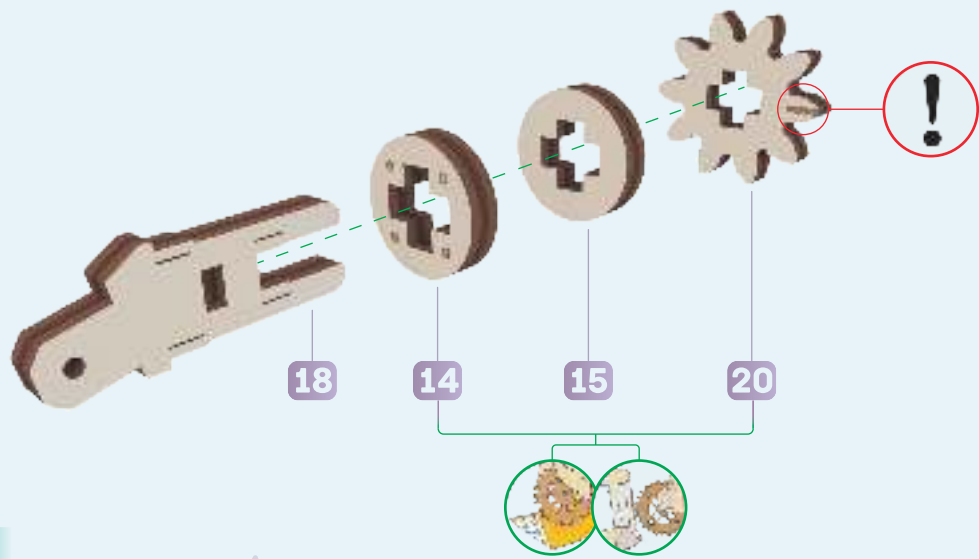

ITL:	Attenzione! Per il corretto funzionamento di questo modello, durante il montaggio, è necessario pulire e lubrificare accuratamente tutte le parti di sfregamento con paraffina. Tutti i meccanismi devono ruotare liberamente.	
Problemi:	Possibili cause e loro eliminazione:	
Il meccanismo ruota stretto	Gli ingranaggi e le boccole sono poco lubrificati o ripuliti. Fate funzionare il meccanismo al minimo.	
Elastici danneggiati sul motore	Rimuovere gli elastici danneggiati e sostituirli con quelli nuovi inclusi nel kit utilizzando la parte 0.

AMAZING EIGHT-LEGGED CREATURES

Have you ever wondered what would happen if there were spiders in space? Would they weave their webs between planets? Would they hunt down asteroids? We at WoodTrick decided to create a space spider model, so you can build it and make up your own story about this hero!

THERE'S ONLY ONE

The Bagheera kiplingi is the only spider on the planet that is an herbivore. They feed on parts of acacia trees. Every other spider species are predators that eat small insects and animals.

THE INTIMIDATING APPEARANCE...

...and a "good heart." Despite their intimidating appearance, most spiders do not attack people unless necessary. This can only happen if you become a threat to the spider—for example, destroy its home.

MULTIFUNCTIONAL TOOL

We used to think that the spider web performed only one role — to assist with hunting. But in fact, this is not quite so. Spiders also use the web to weave cocoons for eggs, as a way to escape if danger arises, and for other purposes.
